

**Some suggestion to improve Xilinx performance in the lab.**

1. Try to use USB flash drive
2. If you use the N drive,
  - a. Copy you project files to the C drive (or USB flash drive) BEFORE starting ISE/Xilinx.
  - b. Start up Xilinx
  - c. Load the project from the local C drive (or USB drive).
3. **\*If working from the C drive\***... Save frequently to the C drive but use Windows explorer to copy the project folder to the N drive. Do not use Xilinx to save directly to the N drive. This may cause a problem if, in the act of saving from within Xilinx, it changes the working environment from "C" to the network.
