

# Exam Instructions

- Use only # 2 pencils on answer sheet.
- Mark answers on both question sheet and answer sheet.
- Mark **only one** answer for each question.
- There may be more than one correct answer.
- Some answers are incomplete and worth partial credit.
- **Show all work on back sides of question sheets.**
- Extra sheets will be provided if necessary.
- You may ask for some standard integrals.
- If you feel the correct answer is not one of the choices, choose “none of the above” and show work for the answer you think is correct.
- There will be four problems in each of the first two exams and seven problems in the final exam.
- For each problem there may be several questions. For each question, there may be up to ten choices for answers. Mark your answers according to question numbers.
- All necessary formulae will be provided using usual notation. No explanations of formulae will be given.
- By design, the exam can be finished in about half the allotted time.
